Animaux ninkãre - français

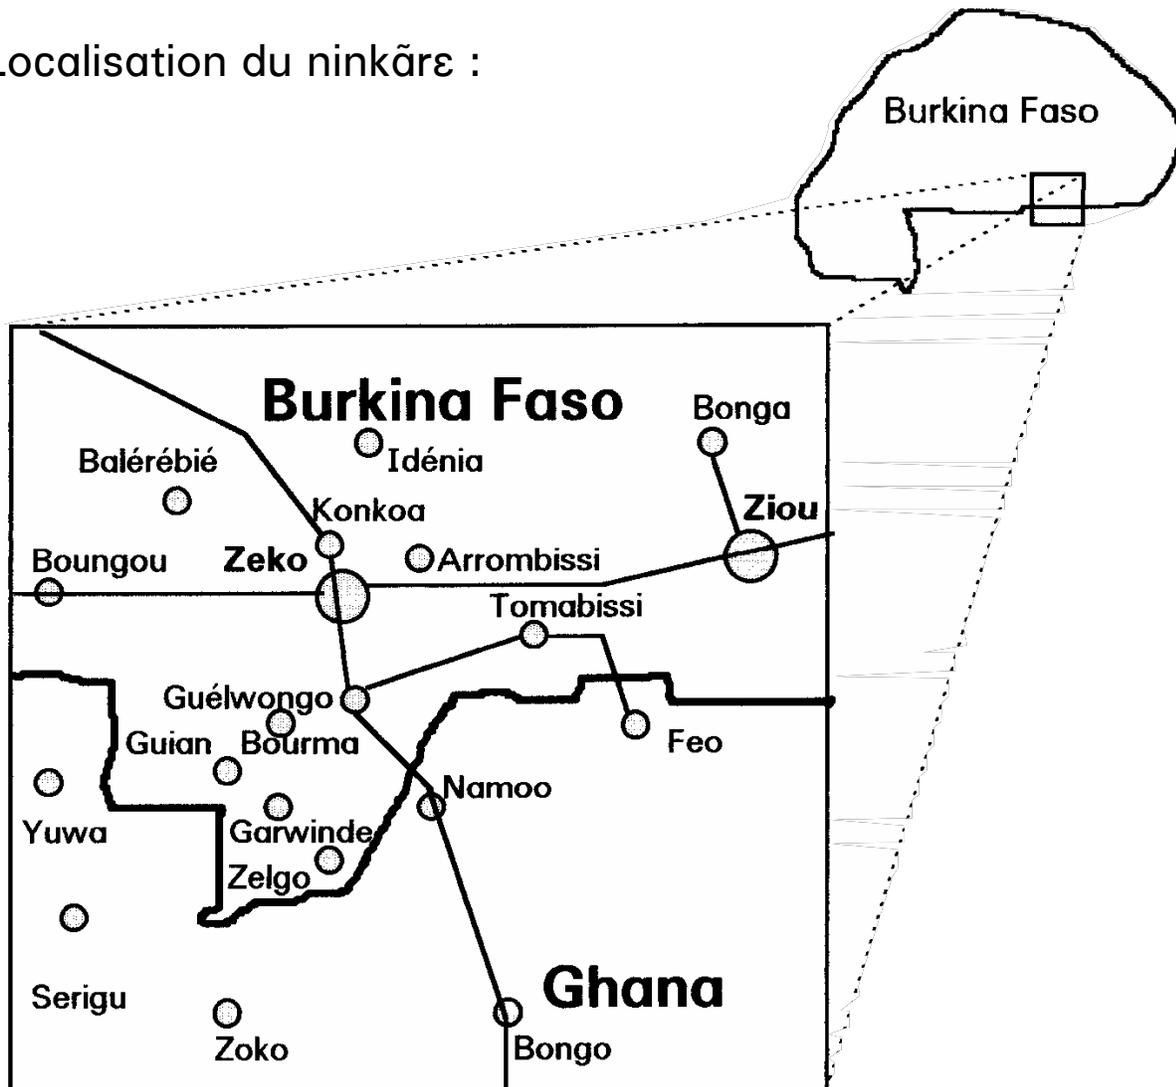

Animaux ninkãre - français

Nous remercions toutes les personnes qui nous ont aidés à identifier ces 270 animaux représentés dans ce livre.

Evidemment, nous n'avons pas pu tenir compte de tous les animaux qui existent dans le pays ninkãre (aussi appelé nankana). En général, nous avons retenu le parler de Guélwongo pour la transcription des noms. Nous sommes conscients des limites de ce document, et nous invitons tous les lecteurs de ce livret à nous faire parvenir leurs questions, commentaires, critiques et suggestions pour améliorer les prochaines éditions.

Localisation du ninkãre :

L'alphabet utilisé dans cette publication est en accord avec l'alphabet agréé par la Commission Nationale des Langues Burkinabè.
